

Blockages of the Natural Flow of Energy

Discharge - Charge + Charge

©2015 Dirk Martens adapted from Jack Painter, PhD.(2002)

Breath Separated Inhalation and Exhalation	Excessive Exhalation	Excessive Inhalation	Switching of Inhalation and Exhalation in Compressed Range	a) Fragmented Exhaled Breath b) Over-shallow excitement c) Held Inhaling Excitement d) Compressed Inhaling & Exhaling Excitement	Lack of Inhalation	Too Much Inhalation Too Much Exhalation	OverExtended/ Collapsed Breath	Too Much Inhalation Too Much Exhalation
Dispersing Holding A Loss of Charge	Excessive Discharge Overtasked Sucking	Incomplete Discharge with Inflated State of Holding	Limited Range of Charge & Discharge	Charge/Discharge Broken Patterns of Charge and Discharge		Excessive Charging and Discharging on Plateau	Complete Discharge	Excessive Discharge or Charge without Relaxation
disposed in clumps	collapses	liquid balloon	dense, conflicted thickness	stringy = superficial fascia (a layer below the skin) is soft and malleable at an intermediate level; fibrous or stringy qualities / deeper: squidy with lack of tone and responsiveness				Fascia
Blocked Characterstyle Schizoid	Oral	Psychopathic	Masochistic	Rigid a) Hysteric b) Passive-feminine c) Phallic-Narcissistic (Macho) d) Masculine-Aggressive
